Evaporative Cooling Audits & Training

AUDITS

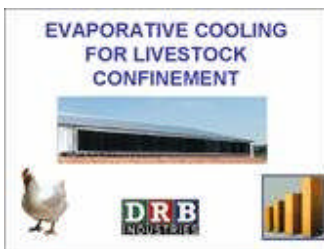

DRB Industries will perform on site Evaporative Cooling Audits and Inspections at your farm site or growing complex. We will inspect your Evaporative Cooling Module, Water Distribution and Quality, do a Remaining Useful Life (RUL) Analysis and prepare a comprehensive report including items such as a **Maintenance Checklist, Cooling Glossary, Make-Up Water and Practical Scaling Index, etc.** to **“Supercharge” your Evaporative Cooling Media Performance and extend the life of your pads.**

Call us at 918-286-7176

TRAINING

DRB Industries will train your growers, live production field personnel, and managers on our extremely popular and informative course **“Evaporative Cooling for Livestock Confinement.”** The most thorough and comprehensive training in the industry.

Considered the leading course on the subject, **Evaporative Cooling for Livestock Confinement provides growers with information and “ammunition” to cool their chicken houses more efficiently and produce birds with high growth rates.**
