

DURASeal XCEL Panel

The DURASeal XCEL Panel combines environmentally friendly materials and innovative technology that outperforms regular panel filters. Constructed of durable, lightweight plastic, the DURASeal Xcel Panel is the next generation in cost-effective air filtration.

FEATURES

- Low airflow resistance and efficiency for better equipment operation and greater energy efficiency.
- Durable, moisture-resistant frame construction will not damage during handling or installation and will not collapse during service life.
- Innovatively designed with an outer media trim that self-seals to the filter track, blocking dust bypass.
- The compact framework of the DURASeal XCEL Panel is lightweight and requires half the storage space than the traditional disposable filters.
- DURASeal XCEL Panel's all plastic composition makes it the ideal disposable filter for the environment. The DURASeal XCEL Panel naturally resists microbial growth and is made of 100% recyclable and incinerable material.
- DURASeal XCEL Panel is easy to handle and install, no metal to cut you or glass fibers to inbed in your skin.
