COALESCER Pre-Filter Pad

Coalescer Pre-Filter Pad

DRB Industries' Coalescer / Pre-Filter Pad is made of 100% Acrylic Non-woven Media and is for use in systems where free moisture is present. It has a very low Pressure Drop and has high Dust Holding Capacity in a moisture removal pad. Moisture droplets are collected and transform into drops, agglomerate, and drain through the channel fibers underneath.

*"Moisture Removal with Dust Collection
for Coastal & Marine Environments"*

Specifications

Part Numbers	PF-CO2	24" x 24" x 2" Frame
	PF-CO3	24" x 24" x 3" Frame
	PF-COM	Media Replacement (no frame)
Initial Resistance		0.20" W.G.
Final Resistance		1.50" W.G.
Average Arrestance		89%
ASHRAE Dust Holding Capacity		320 grams
Moisture Removal		90% @ 5 microns and above
